

NUMBER	<i>11-01</i>
DATE	<i>022311</i>
SUBJECT	<i>Controlled Substance Administration – Update</i>

PURPOSE

Dispensing of Controlled Substances

BACKGROUND

Historically, during inter-facility transfers, the sending facility would supply the transporting ambulance with the controlled substances required for the transport.

PLAN

Inter-facility transfers requiring controlled substances will require a written medical order from the sending physician. Controlled substances will be utilized from the ambulance stock.

All controlled substance administrations should be in accordance with the agency agreement to supply and plan to administer controlled substances.

LIMITATIONS

Controlled substances not approved by the Midstate REMAC ALS Protocol should not be transported or administered by Midstate ALS Providers.
